Summary	● I am a self-taught designer and developer, based in Singapore.
	● I believe that great design is timeless, intuitive and aesthetic.
	● I have learnt that coding standards and best practices are absolutely critical for the long-term success of any software project.
	● I see teamwork, open communication and compassion as the most key values for working together.
	● I realised that adaptability, curiosity and humility are the most important qualities to have for succeeding in the tech industry.

Skills	● Knowledge of **UX methods** like competitive analysis, task flows, user scenarios, personas and interviewing for the creation and testing of UX deliverables
	● Highly proficient in **HTML** and **CSS (with SASS)** for **rapid prototyping** in the browser
	● Good knowledge of **jQuery** and **Javascript**, as well as version control using **Git**
	● Familiar with Unix-based server setup (**LAMP** stack) for website deployment and very comfortable working in the command line environment
	● Skilled in **Adobe Photoshop, Illustrator** and **Sketch** for the creation of web assets

Work Experience

Nurun Singapore (May 2015 - Present)	I am a **Senior developer** responsible for planning and architecting website implementation projects, as well as management of resources. I focus on all things front-end related, making sure our code base adheres to the latest web standards and is performant and accessible. My scope of work involves:
	▪ Working closely with designers, providing direction on the viability of proposed designs
	▪ Planning and designing front-end architecture for scalability and maintainability through best practices like appropriate name-spacing and ITCSS methodology
	▪ Developing bespoke websites for a variety of clients and campaigns
	▪ Assessing hardware requirements for optimal server provisioning
	▪ Creating custom front-end frameworks for large-scale responsive web projects
Pixel Onion Pte Ltd (Oct 2013 – May 2015)	I was a **Front-end developer** and worked on a variety of projects with several major clients, including DBS bank, Mediacorp and Microsoft as well as the San Francisco International Airport. My main responsibilities and contributions included:
	▪ Designing responsive layouts, typography and site components for optimal user experience
	▪ Developing responsive custom Drupal themes written in Sass and Susy
	▪ Site building, deployment and maintenance using Drupal best practices to ensure scalability and security
	▪ Submission of patches and bug fixes to contrib modules

- Developing a minimal base-theme to facilitate custom theme development
- Writing blog posts about Drupal and other web-related topics

Aristal Solutions Sdn Bhd
(Feb 2012 – Oct 2013)

I was part of the **Project Management Office** on a Core Banking Implementation for a Major Banking Group in Malaysia and my responsibilities included:
- Developing the Project Progress Report for weekly Leadership meetings
- Documenting the minutes of meeting for weekly Leadership meetings
- Managing the overall Program Issue Log to ensure program issues were documented clearly and resolved within the required deadlines
- Facilitating the Technical Architecture checkpoint meetings and documenting the issues and action items for follow up

Subsequently, I joined the **Testing workstream** and was in charge of:
- Consolidating and reporting on key testing metrics (defect retesting progress, retest failure rate analysis, offshore development team patch delivery, UAT exit criteria)
- Performing UAT defect trend analysis
- Analysing and monitoring the status of key functionalities, highlighting the root causes of failed key functionalities for management attention
- Developing the presentation deck for the weekly Testing checkpoint meetings

Free-Lance Work
(2006 – 2011)

I was a **web developer** for the Malaysia Basketball Association from 2009 to 2010 and was responsible for:
- Creating and developing the entire website
- Incorporating new features to cater to the demands of both the association and site visitors
- Maintaining and continuously updating website content
- Ensuring the security and integrity of the website's data
- Improving site traffic by utilising SEO techniques to improve search rankings

---
